

Autowave Separator

FOR PROFESSIONAL USE ONLY

Description

Powder to separate paint particles from contaminated Autowave Guncleaner.

Products and additives

Autowave Separator

Basic Raw Materials

Aluminum hydrosilicates, salts and polymers

Application process

Autowave Guncleaner can be reclaimed by adding 1% of Autowave Separator to the contaminated Autowave Guncleaner. If necessary, add another ½-1% of Autowave Separator to coagulate the remaining contamination. All existing coagulation devices work according to the same process:

1. Add the Autowave Separator as specified to the contaminated Autowave Guncleaner.
2. Stir/mix thoroughly until paint particles have been coagulated.
3. Pour mixture through fine filter bag in order to separate solids from liquid, by using a fine filter bag.
4. The Autowave Gun Cleaner can now be used again

Autowave Gun Cleaner can effectively be recycled three times, after which, it should be disposed of.

Product storage

Product shelf-life is determined when products are stored unopened at 20°C. Autowave Separator must be stored in closed can to avoid any contact with water/moisture dampness. After contact with water/moisture product will have limited shelf life. Avoid extreme temperature fluctuation. *Product shelf life data see TDS S9.01.02*

Use suitable respiratory protection

Akzo Nobel Car Refinishes recommends the use of a fresh air supply respirator

Akzo Nobel Car Refinish bv. **Change in local name in case of difference; i.e. Coatings LTD / Inc.**
